

Verio Managed Web Servers for Windows from MarketWorks, LLC

We offer a simple, scalable path that allows you to grow your site from a shared hosting account to a virtual or dedicated Web hosting server.

Our award-winning solutions for Windows feature:

- » **.NET Framework** – Web designers can use Microsoft® Web tools to build Websites, and ASP.NET Developers can create dynamic Websites, .NET applications, and XML Web services.
- » **MultiSite Pro Subhosting** – MultiSite Pro technology delivers control over subhosted Websites. Sites can be hosted in independent AppPools, or grouped together to share account resources.
- » **Resource Virtualization** – Through virtualized RAM and CPU, we guarantee server performance for all Windows®-based hosting accounts. For our Web Servers for Windows, server resources (CPU and RAM) are divided into Virtual Resource Units (VRUs) that can be allocated to a site or site group.
- » **Email Server Capability** – Email server functionality is included for all of your domains, parked or hosted.
- » **Marketing Tools** – Valuable tools are included with your hosting plan to assist you with Search Engine placement, banner ads, and online marketing management.
- » **MS SQL 2005** – Selected accounts based on Windows come standard with an MS SQL 2005 database. Available disk space varies by plan type.
- » **MySQL** – MySQL is the world's most popular open source database.
- » **URL Rewrite** – ISAPI_Rewrite 3 is an Apache.htaccess mod_rewrite for Windows. It is used for search engine optimization, to proxy another server's content, to stop hotlinking, and to strengthen site security.
- » **PHP Starter Kits (Labs)** – This includes applications like WordPress, Joomla, MediaWiki, PHPEventCalendar, and Geeklog.
- » **ShopSite Shopping Cart** – Our Web Servers for Windows come pre-installed with a ShopSite Starter shopping cart, opt-in email marketing functions, and the ability to commerce-enable existing Websites.
- » **EasySite Plus** – Our Web Servers for Windows have access to our EasySite Plus design tool. With over 200 Web templates, blogging capability, a news ticker, unlimited photo galleries, and maps and driving directions, EasySite Plus is a simple way to build a robust Website without having any previous design experience.
- » **Hosting for Windows Labs** – We have a unique environment for advanced developers that contains some of the latest and greatest hosting innovations, many of which were created by our award-winning development team.
- » **Multiple Development Language Support** – We support many different programming languages on our platform including all of the languages supported in the .NET framework, ASP.NET, PHP, CGI, Perl, and JavaScript.
