

Shared Hosting for Microsoft® from MarketWorks, LLC

We offer a simple, scalable path that allows you to grow your site from a shared hosting account to a virtual or dedicated Web hosting server.

Award-winning solutions for Windows feature:

- » .NET Framework – Web designers can use Microsoft® Web Tools to build Websites, and ASP.NET Developers can create dynamic Websites, .NET applications, and XML Web services.
- » MultiSite Subhosting – MultiSite technology delivers control over subhosted Websites. Each site is like its own hosting plan, including features such as individual FTP rights and Stat logs.
- » Server Resource Virtualization – Through virtualized RAM and CPU, we guarantee server performance for all Windows®-based hosting accounts.
- » Domain Mail – Email services are available for all of your domains, parked or hosted.
- » Marketing Tools – Valuable tools are included with your hosting plan to assist you with Search Engine placement, banner ads, and online marketing management.
- » MS SQL 2005 – Selected Windows-based accounts come with a 200 MB MS SQL 2005 database.
- » ShopSite Shopping Cart – Selected Windows-based accounts come pre-installed with a ShopSite Starter shopping cart, opt-in email marketing functions, and the ability to commerce-enable existing Websites.
- » EasySite Plus – Selected Windows-based plans have access to our EasySite Plus design tool. With over 200 Web templates, blogging capability, a news ticker, unlimited photo galleries, and maps and driving

directions, EasySite Plus is a simple way to build a robust Website without having any previous design experience.

- » Windows-Based Labs – We have a unique environment for advanced developers that contains some of the latest and greatest hosting innovations, many of which were created by our award-winning development team.
- » Multiple Development Language Support – We support many different programming languages on our platform including all of the languages supported in the .NET framework, ASP.NET, PHP, CGI, Perl, and JavaScript.

Windows-based hosting options

- Starter Plan: A basic Web hosting plan for up to two independent Websites, Web-based design tool included.
- PremierSite Plan: A hosting plan geared toward two Websites with EasySite Plus, featuring mapping, photo albums, shopping cart functionality, and much more.
- MultiSite Plan: Subhosting for up to 10 Websites.
- e-Storefront Plan: Introductory e-commerce, which includes ShopSite shopping cart. Microsoft® FrontPage 2003 Server extensions
- SQL Plan: All the power of a Windows-based hosting plan plus a 200 MB MS SQL 2005 database.
- Webmaster Plan: The top-of-the-line Shared Hosting for Windows plan, which includes all the key features, such as subhosting for 30 Websites, MS SQL 2005, domain mail, ShopSite shopping cart, and maximum disk space and data transfer.
